NATURA NUDA

Freedom through natural nudity

By **ALTAN**

Virtue is not in the clothed body; it is in the nature of the soul.

When you are in the middle of nature, alone and sheltered from the eyes of civilization, you only want one thing: to get rid of the last barricades that stand between you and the elements, between you and the breath of air, the caresses of the sun, the bites of the cold, the baths of silence, the erotic contact with the earth beneath your feet. It is then that you let go of your shyness and your modesty and you let go of all the constraints that envelop your skin and you offer your body to freedom.

This book is a collection of photos that bear witness to this quest for freedom, solitude and almost erotic and libidinous complicity with nature.
